Sustainable & Green Public Spaces in the Historic City of Córdoba

Erasmus+ Blended Intensive Programme

City and river:

Córdoba and Guadalquivir river

coexistence - The study area focuses on the urban reach of the Guadalquivir River as it passes through Córdoba, a space where the dialectic between nature and urbanity has defined the city's identity for millennia. The river serves not merely as a geographical boundary but as the backbone of a blue and green infrastructure that underpins the Outstanding Universal Value of its historic center and the surround of the Mosque-Cathedral.

GREEN-ACTION workshop

Sustainable & Green Public Spaces in the Historic City of Córdoba

Erasmus+ Blended Intensive Programme

Zone 1:

Miraflores, Campo de la Verdad, and the Sacunda Suburb - Located on the left bank, this sector represents the first southward urban expansion. The Sacunda suburb was a vibrant hub during the Emiral period until the 818 AD uprising led to its destruction and a subsequent ban on building, relegating it to historical marginality or agricultural use. The regeneration project must address the transition between the archaeological void, the traditional Campo de la Verdad neighbourhood, and the new Miraflores Park. It should also consider urban and heritage vistas and the incorporation of planned facilities, seeking an ecosystemic 'stitching' that respects the site's memory.

Erasmus+ Blended Intensive Programme

Zone 2:

The Alcázares of Córdoba and the Sotos de la Albolafia - This area constitutes the heart of the city's civil and religious power. However, the historic permeability between the Alcázar de los Reyes Cristianos and the river was fractured in the 20th century by the San Rafael Bridge project and the opening of Avenida del Alcázar, which acts as a physical and visual barrier. The objective is to propose solutions that restore this link by integrating the Sotos de la Albolafia—a Natural Monument serving as a biodiversity refuge in the urban core—where riparian vegetation and birdlife coexist with the ancient mill structures of the Culeb weir.

Erasmus+ Blended Intensive Programme

Zone 3:

Roman Córdoba: Colina de los Quemados and the "Green Block" - The city's origins lie at the western end within the Iberian oppidum of the Colina de los Quemados. This geographical landmark visually dominates the Guadalquivir and is associated with historic military sites, such as Hannibal's -or Julius Caesar- campaigns. Nearby lies the "Green Block" (Manzana Verde), an area of high environmental potential encompassing Cruz Conde Park, the "Children's City", the Zoo, and the Botanical Garden, alongside the mills of the Alhadra weir. This sector requires a strategy for ecosystemic and physical continuity, linking the most ancient archaeological substrate with contemporary green infrastructure.

MANAGEMENT PLAN

UNESCO world heritage site Historic Center of Cordoba

The screenshot shows the UNESCO website with the following details:

- Header:** UNESCO World Heritage Convention
- Navigation:** Our expertise, The List, Activities, Partnerships, Publications, Search the List, Filter.
- Section:** Historic Centre of Cordoba
- Content:** Description, Maps, Documents, Gallery, Video, Indicators.
- Text:** Cordoba's period of greatest glory began in the 8th century after the Moorish conquest, when some 300 mosques and innumerable palaces and public buildings were built to rival the splendours of Constantinople, Damascus and Baghdad. In the 13th century, under Ferdinand III, the Saint, Cordoba's Great Mosque was turned into a cathedral and new defensive structures, particularly the Alcázar de los Reyes Cristianos and the Torre Fortaleza de la Calahorra, were erected.
- Image:** A large photograph of the interior of the Great Mosque of Cordoba, showing its iconic columns and arches.
- Map:** A small map of the region showing the location of Cordoba.
- Information:** Spain, Date of inscription: 1984, Significant modifications to the boundaries: 1993, Criteria: (i)(ii)(iii)(iv), Property: 80.28 ha, Dossier: 313bis, Province of Cordoba, Autonomous Community of Andalusia, N27 52 45.1 W4 48 47.
- Language:** English, French, Arabic, Chinese, Russian, Spanish, Japanese, Dutch.
- Disclaimer:** The nomination files produced by the States Parties are published by the World Heritage Centre on the website and/or on its electronic system in order to increase transparency, access to information and to facilitate the preparations of comparative analysis by other nominating States Parties.
- Text:** The sole responsibility for the content of each Nomination file lies with the State Party concerned. The publication of the Nomination files on the website, in the electronic system, does not imply the expression of any opinion whatsoever of the World Heritage Committee or of the Secretariat of UNESCO concerning the history or legal status of any country, territory, city or area or of its boundaries.
- Section:** State of Conservation (SOC) by year.
