A detailed map of the Vélez River basin, which spans across several provinces in Andalucía. The map shows the river's course from its source in the Sierra de las Nieves through the provinces of Málaga, Granada, and Almería, finally emptying into the Mediterranean Sea near Vélez-Málaga. Numerous tributaries and smaller rivers are depicted as lines of varying thicknesses. Towns and cities along the river are labeled, including Vélez-Málaga, Antequera, Málaga, Granada, and Almería. The map also includes a scale bar at the bottom right.
